**Email:**    juanjo.gaviria23@hotmail.com
**Location:** Cartagena - Colombia

## PROFILE

React Developer with strong experience building responsive and dynamic web interfaces using React.js, Next.js, TypeScript, and modern frontend practices. I specialize in creating scalable components, optimizing performance, and delivering exceptional user experiences. I'm passionate about continuous learning, working in agile teams, and integrating efficient solutions using tools like Git, Figma, and Docker. My focus is on crafting high-quality, maintainable code with attention to UI/UX and business impact.

## EDUCATION

**Technology in Industrial Enviromental Manegement | Tecnologico Comfenalco**
January *2021 - April 2022*

**High School | Gimnasio Cervantes**

*2014*

## LANGUAGES

- Spanish (native)
- English (B1+)

## CERTIFICATES

*FullStack Web Developer* | **Enyoi** -
August *2023*

*Scrum Foundation Professional* | **CertiProf** -
April *2023*

*Git y GitHub Professional* | **Netzun** -
August *2023*

*Advanced Python Developer* | *Netzun* - *August 2023*

## SKILLS

- NODE JS, REACT JS, NEXT JS, NEST JS & EXPRESS JS
- JAVASCRIPT & TYPESCRIPT
- HTML, CSS & TAILWIND
- PYTHON & MYSQL
- JAVA & SPRING BOOT
- GIT & GITHUB
- SCRUM

## HANDLING OF TOOLS

- POSTMAN
- GITBASH
- FIGMA
- VISUAL STUDIO CODE
- DOCKER
- KUBERNETES

## WORK EXPERIENCE

**FINTIC SAS**

**Since October 2023 - November 2023**

**Customer Success**

- I led initiatives to improve the efficiency and performance of JavaScript code, implementing efficient programming practices and refactoring critical sections of the code base.

- I collaborated closely with the development team to design, implement and test new features that improved the user experience and overall functionality of the platform.

- I identified and solved technical challenges, performing in-depth analysis of existing problems and implementing effective solutions to optimize system stability and performance.

**INSIGHT 4.0 SAS**

**Since January 2023 - September 2024**

**Fullstack Developer**

- Developed backend applications with Express.js, integrating PostgreSQL in Docker, optimizing performance, and ensuring scalability in production environments.

- Developed complex and reusable frontend components using React.js, Next.js, and TypeScript, enhancing performance and maintainability. Focused on hooks, state management, and responsive design for optimal user experience.

**KG GROUP SAS (JPG)**

**Since October 2024 -  Present**

## Fullstack Developer

- Designed and implemented backend solutions using Express.js, integrating advanced automations for WhatsApp, incorporating artificial intelligence (ChatGPT), natural language processing (NLP), and services like Twilio and Xero.

- Leading frontend development using React and Tailwind CSS to build responsive, accessible, and modular UIs. Working with agile methodologies and closely with design and backend teams to deliver scalable solutions.

- Frontend & UI/UX Development: Implemented responsive and conversion-optimized web interfaces on no-code/low-code platforms, including Webflow, Wix, and Shopify.

- Developed automation scripts with Python, optimizing processes using libraries like Pandas, automating workflows, and improving data management efficiency.

- Built automations in HubSpot and Gmail using Make (Integromat) and webhooks, enhancing communication and customer management through dynamic integrations.

- Optimized the use of technological platforms, ensuring operational continuity and improving efficiency in internal processes.
